- Q1 NetSuite Cloud ERP (SaaS) Revenue \$0.7 billion, up 21% in USD, up 21% in constant currency

AUSTIN, Texas, September 11, 2023 -- Oracle Corporation (NYSE: ORCL) today announced fiscal 2024 Q1 results. Total quarterly revenues were up 9% year-over-year in USD and up 8% in constant currency to \$12.5 billion. Cloud services and license support revenues were up 13% in USD and up 12% in constant currency to \$9.5 billion. Cloud license and on-premise license revenues were down 10% in USD and down 11% in constant currency to \$0.8 billion.

Q1 GAAP operating income was \$3.3 billion. Non-GAAP operating income was \$5.1 billion, up 13% in USD and up 12% in constant currency. GAAP operating margin was 26%, and non-GAAP operating margin was 41%. GAAP net income was \$2.4 billion. Non-GAAP net income was \$3.4 billion, up 19% in USD and up 17% in constant currency. Q1 GAAP earnings per share was \$0.86 while non-GAAP earnings per share was \$1.19, up 16% in USD and up 14% in constant currency.

Short-term deferred revenues were \$11.1 billion. Q1 operating cash flow was \$7.0 billion, up 9%, and Q1 free cash flow was \$5.7 billion, up 21%.

"Oracle Cloud Infrastructure revenue grew 66% in Q1, much faster than our hyperscale cloud infrastructure competitors," said Oracle CEO, Safra Catz. "Total cloud services revenue, Infrastructure plus Applications, grew 30% to \$4.6 billion in the quarter. Oracle Cloud Services plus License Support revenue now accounts for 77% of Oracle's total revenue. This highly-predictable, highly-profitable recurring revenue stream—combined with continued expense discipline—drove

16% growth in non-GAAP earnings per share, 21% growth in free cash flow, and \$7.0 billion in operating cash flow in the Q1."

"Is Generative AI the most important new computer technology ever? Maybe!," said Oracle Chairman and CTO, Larry Ellison. "Self-driving cars, molecular drug design, voice user interfaces—billions of dollars are being invested in AI. As of today, AI development companies have signed contracts to purchase more than \$4 billion of capacity in Oracle's Gen2 Cloud. That's twice as much as we had booked at the end of Q4. The largest AI technology companies and the leading AI startups continue to expand their business with Oracle for one simple reason—Oracle's RDMA interconnected NVIDIA Superclusters train AI models at twice the speed and less than half the cost of other clouds."

The board of directors declared a quarterly cash dividend of \$0.40 per share of outstanding common stock. This dividend will be paid to stockholders of record as of the close of business on October 12, 2023, with a payment date of October 26, 2023.

⁽¹⁾ We compare the percent change in the results from one period to another period using constant currency disclosure. We present constant currency information to provide a framework for assessing how our underlying businesses performed excluding the effect of foreign currency rate fluctuations. To present this information, current and comparative prior period results for entities reporting in currencies other than United States dollars are converted into United States dollars at the exchange rates in effect on May 31, 2023, which was the last day of our prior fiscal year, rather than the actual exchange rates in effect during the respective periods. Movements in international currencies relative to the United States dollar during the three months ended August 31, 2023 compared with the corresponding prior year period increased our total revenues by 1 percentage point, total operating expenses by 1 percentage point and operating income by 3 percentage points.

- (1) This presentation includes non-GAAP measures. Our non-GAAP measures are not meant to be considered in isolation or as a substitute for comparable GAAP measures, and should be read only in conjunction with our consolidated financial statements prepared in accordance with GAAP. For a detailed explanation of the adjustments made to comparable GAAP measures, the reasons why management uses these measures, the usefulness of these measures and the material limitations on the usefulness of these measures, please see Appendix A.
- (2) We compare the percent change in the results from one period to another period using constant currency disclosure. We present constant currency information to provide a framework for assessing how our underlying businesses performed excluding the effect of foreign currency rate fluctuations. To present this information, current and comparative prior period results for entities reporting in currencies other than United States dollars are converted into United States dollars at the exchange rates in effect on May 31, 2023, which was the last day of our prior fiscal year, rather than the actual exchange rates in effect during the respective periods.
- (3) Stock-based compensation was included in the following GAAP operating expense categories:

⁽¹⁾ The sum of the quarterly information presented may vary from the year-to-date information presented due to rounding.

⁽²⁾ We compare the percent change in the results from one period to another period using constant currency disclosure. We present constant currency information to provide a framework for assessing how our underlying businesses performed excluding the effect of foreign currency rate fluctuations. To present this information, current and comparative prior period results for entities reporting in currencies other than United States dollars are converted into United States dollars at the exchange rates in effect on May 31, 2023 and 2022 for the fiscal 2024 and fiscal 2023 constant currency growth rate calculations presented, respectively, rather than the actual exchange rates in effect during the respective periods.

ORACLE CORPORATION Q1 FISCAL 2024 FINANCIAL RESULTS EXPLANATION OF NON-GAAP MEASURES

To supplement our financial results presented on a GAAP basis, we use the non-GAAP measures indicated in the tables, which exclude certain business combination accounting entries and expenses related to acquisitions, as well as other significant expenses including stock-based compensation, that we believe are helpful in understanding our past financial performance and our future results. Our non-GAAP financial measures are not meant to be considered in isolation or as a substitute for comparable GAAP measures and should be read only in conjunction with our consolidated financial statements prepared in accordance with GAAP. Our management regularly uses our supplemental non-GAAP financial measures internally to understand, manage and evaluate our business and make operating decisions. These non-GAAP measures are among the primary factors management uses in planning for and forecasting future periods. Compensation of our executives is based in part on the performance of our business based on these non-GAAP measures. Our non-GAAP financial measures reflect adjustments based on the following items, as well as the related income tax effects:

- <u>Stock-based compensation expenses</u>: We have excluded the effect of stock-based compensation expenses from our non-GAAP operating expenses, income tax effects and net income measures. Although stock-based compensation is a key incentive offered to our employees, and we believe such compensation contributed to the revenues earned during the periods presented and also believe it will contribute to the generation of future period revenues, we continue to evaluate our business performance excluding stock-based compensation expenses. Stock-based compensation expenses will recur in future periods.
- <u>Amortization of intangible assets</u>: We have excluded the effect of amortization of intangible assets from our non-GAAP operating expenses, income tax effects and net income measures. Amortization of intangible assets is inconsistent in amount and frequency and is significantly affected by the timing and size of our acquisitions. Investors should note that the use of intangible assets contributed to our revenues earned during the periods presented and will contribute to our future period revenues as well. Amortization of intangible assets will recur in future periods.
- Acquisition related and other expenses; and restructuring expenses: We have excluded the effect of acquisition related and other expenses and the effect of restructuring expenses from our non-GAAP operating expenses, income tax effects and net income measures. We incurred expenses in connection with our acquisitions and also incurred certain other operating expenses or income, which we generally would not have otherwise incurred in the periods presented as a part of our continuing operations. Acquisition related and other expenses consisted of personnel related costs for transitional and certain other employees, certain business combination adjustments including certain adjustments after the measurement period has ended, and certain other operating items, net. Restructuring expenses consisted of employee severance and other exit costs. We believe it is useful for investors to understand the effects of these items on our total operating expenses. Although acquisition related and other expenses and restructuring expenses may diminish over time with respect to past acquisitions and/or strategic initiatives, we generally will incur certain of these expenses in connection with any future acquisitions and/or strategic initiatives.
